

1. + 5 points: Gives two examples of valid data structures(Array lists, Stack, ect.)
2. + 5 points: Mentions that memory has a much larger capacity/Registers running out of space
3. + 3 points: Only mentions one example of a valid data structure
4. + 0 points: Mentions how main memory is used to hold data in a more permanent way (incorrect since RAM clears itself after shutdown)
5. + 0 points:Incorrect / blank / no answer
